

To run the program:

Go to the **libsvm-3.22** using the command **cd**.

**Run the following commands in order:**

1. On the bash, type

```
>> make
```

Press enter

2. For kernels 0 to 4:

Do

```
./svm-train -t [0-4] training.new
```

```
./svm-predict validation.new training.new.model output-  
file.txt
```
